1ST INTERNATIONAL CONFERENCE

**Biodiversity in Service
of Biotechnologies**

March 09 and 10, 2020

University Center A. Boussouf of Mila, Algeria

University Center Abdelhafid Boussouf Mila

Preamble

The University Center of Abdelhafid Boussouf - Mila, emerging and expanding center, is in full opening on its environment with great environmental, agricultural and hydraulic potentialities making it a virgin ground and conducive to a scientific research promising.

Its human potentialities with scientific and technical qualifications are mobilized, motivated and predisposed when organizing scientific events to gather an academic consortium of reflection, analysis and debate on issues of progress and news including those concerning the country's development in the field of scientific research and synergistic interaction with the environment, agriculture, health, and the valorization of natural resources mainly through biotechnology. In addition, the mastery of knowledge of biodiversity in different natural ecosystems provides information on the potentialities and possibilities of biotechnological applications for the benefit of man by proposing solutions to development constraints through scientific research.

In this context, the first international Conference "Biodiversity in the service of Biotechnologies (ICBIO 2019)", will open a scientific dimension of communication and exchange of experiences between researchers in the field of science of nature and life especially those involved in the areas of biodiversity and biotechnology.

This proposed scientific meeting will be an opportunity for teacher-researchers, doctoral students and other specialists from the socio-economic sector to exchange their experiences in this field of research for a dynamic of productive collaboration on the one hand. On the other hand, the participation of eminent international researchers in this scientific meeting will be an opportunity to exchange and update the state of knowledge and research approach and can, thus, open multiple opportunities for collaboration at interest certain for Algerian researchers.

Tracks

- Valorization of genetic resources (animals and plants)
- Impact of climate changes on the evolution of agricultural production systems
- Evaluation of the genetic, agronomic and environmental impact of the species prospected
- Biotechnology applied to Agriculture and Agro-food
- Biotechnology applied to Environment and Health

Instructions to authors

1. Title (Times New Roman, 14, Centered, Bold)
2. Author names (Times New Roman, Centered, the participant in bold)
3. Affiliations and addresses (Times New Roman, 12, Centered, Italic)
4. Type of communication (Oral or Poster)
5. Abstract (Times New Roman, 12, Justified, 300 words max)
6. Key words (Times New Roman, 12, Justified, 6 words max)
7. Language (French or English)

Registration dates and deadlines

The registration to the seminar should be done on the following link:

<https://>

Abstract submission deadline: **October 20, 2019**

Notification of acceptance: **November 1, 2019**

Notification of the final acceptance: **November 20, 2019**

Registration fees

Without accommodation

Teachers-Researchers: 6 000 DA

Students: 4 000 DA

With accommodation (01 nights)

Teachers - researchers: 10 000 DA

Students: 7 000 DA

Foreigners: (150 €)
